Case Study: Groupon

GROUPON®

Tech Stack

django

Django

MySQL

DEV.co developed Groupon's supply chain management software that is now used in over 44 countries and supports some \$4 billion worth of business annually. Groupon's custom software was built from the ground up and manages multiple complex internal operational processes for the company.

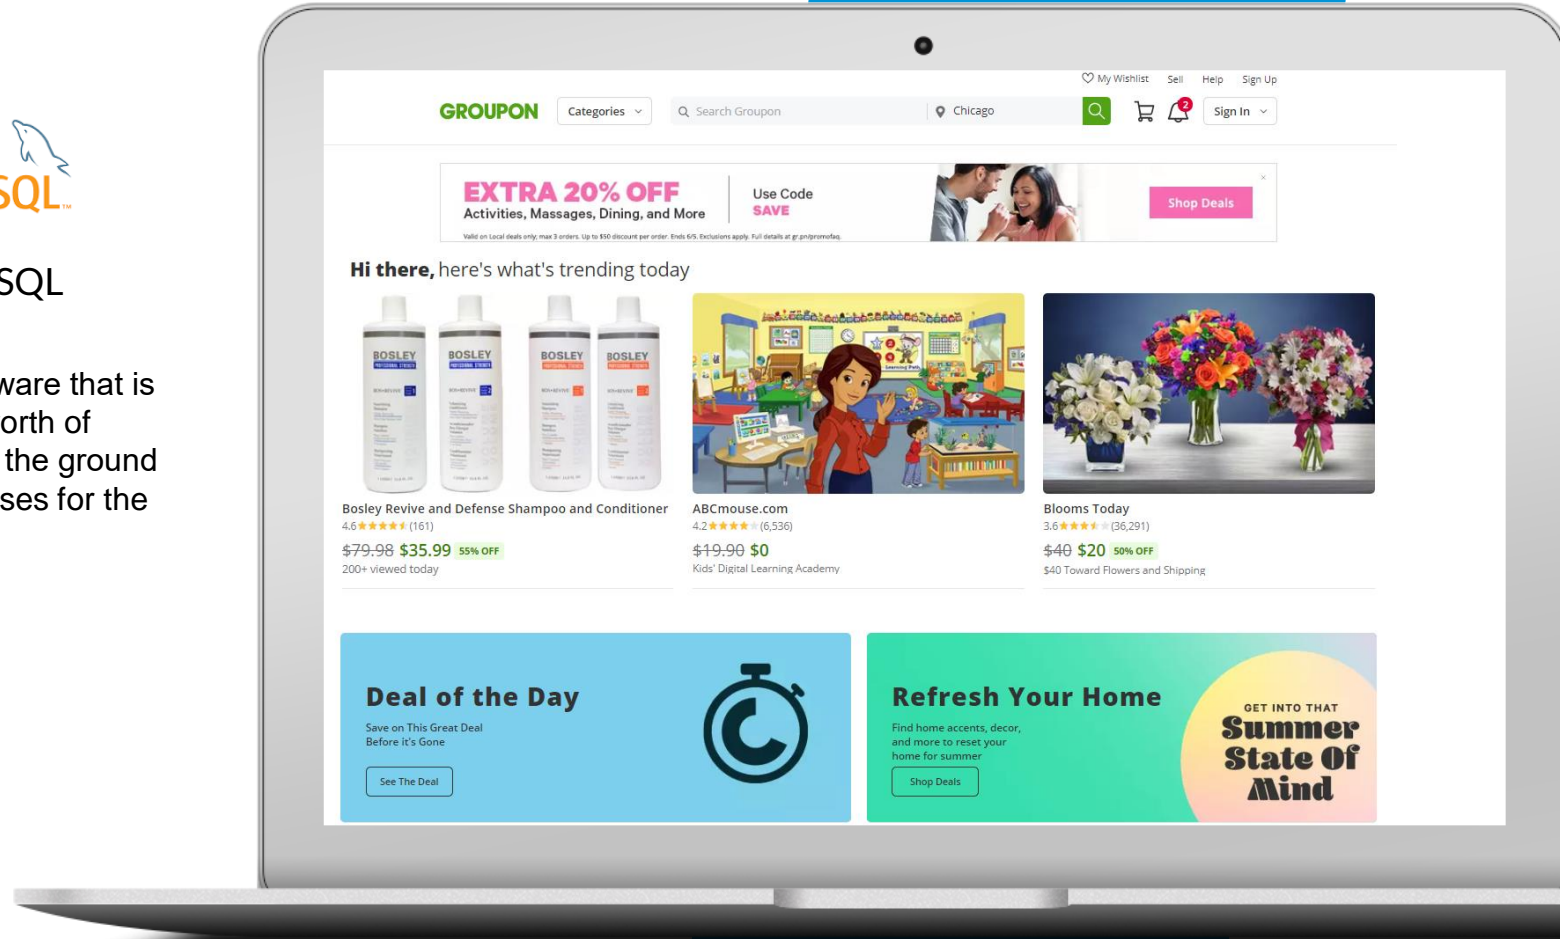

“

DEV.co is an excellent company of software engineers. They have helped us upgrade different processes that have improved our products' performance. They are very easy to work with and pay very close attention to detail. I would highly recommend them and look forward to working closer with them.

Ivan @ Groupon
